

Dylan Bracken

dylanbracken30@gmail.com - (401) 336-0474

Summary

Detail-oriented data and compliance professional with experience in financial data analysis, regulatory reporting, and workflow optimization within banking and financial services environments. Skilled in Excel, SQL, Python, and Salesforce Analytics with hands-on experience cleaning, modeling, and validating large-scale financial datasets to ensure regulatory compliance. Proven ability to design reporting frameworks, automate processes, and communicate data-driven findings to senior management and cross-functional stakeholders. Eager to contribute to a fast-paced, compliance-focused team in capital markets and deepen expertise in regulatory capital frameworks and financial risk management.

Work Experience

Citizens Securities, Inc.

April 2025 - Present

Data Remediation Specialist

Johnston, RI

- Integrated and validated financial data across Salesforce, OFAC reports, and Wealthscape to identify client account discrepancies and drive remediation across 80,000+ accounts where clients had missing or incorrect data.
- Analyzed OFAC reports and enforced compliance standards to ensure adherence to broker/dealer KYC regulatory requirements; performed root cause analysis on data anomalies and worked with external data aggregators to prevent recurrence.
- Designed and documented end-to-end team procedures from the ground up, presenting and defending methodology to Risk Management, including systems impacted and compliance rationale.
- Designed dashboards in Salesforce Analytics Studio and Excel to identify 13,000+ clients missing internal Brokerage Identification Number; managed account creation and linked heldaway third-party accounts to internal systems for compensation tracking and reporting compliance.
- Applied AI-assisted tools to build Python automation scripts, streamline data workflows, and accelerate analysis, including parsing unstructured data related to the 13,000+ client records missing Brokerage Identification Numbers.
- Collaborate cross-functionally with technical and non-technical stakeholders to develop solutions and implement and validate fixes across business systems.
- Onboarded and mentored a junior team member, training them on remediation procedures, compliance standards, and internal systems.

Chisholm Chisholm & Kilpatrick, LTD

July 2023 - March 2025

Trusts and Estates Case Manager

Providence, RI

- Managed a caseload of 250+ trust and estate cases annually, coordinating and facilitating gifts made to charitable organizations, resulting in the distribution of over \$10 million in assets
- Audited and analyzed financial records and estate accountings, resolving discrepancies in asset distribution and identifying errors to recover hundreds of thousands of dollars for clients.
- Developed and presented legal reports and visualizations, transforming statutory and financial data into actionable insights for supervising attorneys and charitable clients.
- Collaborated with cross-functional teams (attorneys, financial institutions, and trustees) to ensure reporting accuracy and timely distributions.

Covenants Watch

Dec. 2021 – June 2022

Data Research Intern

Taipei, Taiwan

- Conducted legal and policy research on international human rights law, compiling and structuring datasets across 25+ countries to drive data-informed advocacy campaigns.
- Translated, drafted, and edited marketing materials such as newsletters and website content that reached thousands across the country
